## TWIN SANITY™

## **WARNING: READ BEFORE USING YOUR PlayStation®2**

### **COMPUTER ENTERTAINMENT SYSTEM.**

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games, including games played on the PlayStation®2 console, may induce an epileptic seizure in these individuals. Certain conditions may induce previously undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game — dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions — **IMMEDIATELY** discontinue use and consult your physician before resuming play.

### **WARNING TO OWNERS OF PROJECTION TELEVISIONS:**

Do not connect your PlayStation®2 console to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

### **USE OF UNAUTHORIZED PRODUCT:**

The use of software or peripherals not authorized by Sony Computer Entertainment America may damage your console and/or invalidate your warranty. Only official or licensed peripherals should be used in the controller ports or memory card slots.

### **HANDLING YOUR PlayStation®2 FORMAT DISC:**

- This disc is intended for use only with PlayStation®2 consoles with the NTSC U/C designation.
- Do not bend it, crush it or submerge it in liquids.
- Do not leave it in direct sunlight or near a radiator or other source of heat.
- Be sure to take an occasional rest break during extended play.
- Keep this compact disc clean. Always hold the disc by the edges and keep it in its protective case when not in use. Clean the disc with a lint-free, soft, dry cloth, wiping in straight lines from center to outer edge. Never use solvents or abrasive cleaners.

Who are the Twins? They threaten revenge against Dr. Cortex, but why? And where are they from?

Using Dr. Cortex's Psychetron machine, the Crash Team must travel between dimensions in order to solve the mystery of the Twins' identity, before finally confronting the evil duo in person.

# GENERAL CHARACTER MOVEMENT

## Directional Movement

The left analog stick controls the direction of character movement; this movement is relative to the camera.

The speed of the character's movement depends on the amount of pressure applied to the left analog stick. Pushing the stick halfway out from the center will make the character begin walking, whereas pushing the stick as far as possible in any direction will make the character run.

## Camera Control

The right analog stick controls the camera.

## CHARACTER CONTROLS

### CRASH BANDICOOT

Crash was an ordinary bandicoot whose life was forever changed in a failed experiment performed upon him by the evil Dr. Cortex. He would be happy to spend his days basking in the warm sun, but adventure will not leave him alone.

## DR. NEO CORTEX

Dr. Neo Cortex is an evil scientist—the creator of Crash Bandicoot and also his sworn enemy, for Crash has ruined every one of Cortex's wicked schemes. Now Cortex has to swallow his pride and work with that meddling marsupial, at least until the opportunity arises to turn things to his advantage. This is the worst day of his life...

## NINA CORTEX

Nina is Dr. Cortex's beloved niece. When she began to show disturbing signs of a kind heart, Dr. Cortex made a few modifications and sent her to study at the Academy of Evil. Nina still has warm feelings for cute animals, but now they avoid her hugs for fear of being crushed by her spring-loaded, steel-trap hands. Now she's skipping school to lend her uncle a bionic hand against the Evil Twins.

## CRASH & CORTEX

Danger can bring together the most unlikely of allies...

When they're bound together by circumstance, the player must control Crash and Cortex as one combined entity. Crash is in control and Cortex is his reluctant partner.

If Cortex is holding a crystal, Crash may attach to him by spinning into him. Now Crash and Cortex are both "crystal crazy" and will fight relentlessly over the crystal, keeping them joined together. When they're joined, Crash takes full advantage of the situation, turning Cortex into a lethal weapon.

Slam	○ button
Jump	× button
Twin Spin	□ + ○ buttons

### HumiliSkate

Cortex takes a dive and Crash jumps onto his back, transforming him into a makeshift sled. Did Cortex trip, or was he pushed?

### Doc Amok

A terrified Dr. Cortex runs blindly through the scene, his vision obscured by something terrible stuck on his head. Crash must clear the way of TNT crates and enemy creatures before Cortex runs afoul of them.

### RollerBrawl

When Crash and Cortex don't see eye to eye, players will have to manage the mayhem that explodes when these two duke it out in a rollerbrawl. Control the two characters as they careen downhill, bound together as a ball of flying fists and feet.

# COLLECTIBLES & CRATES

There are various collectibles scattered throughout the game. Crash can collect these items to earn extra lives and unlock bonus content.

## Wumpa

There are lots of Wumpa fruit in the world. Collecting 100 Wumpa earns the player an extra life. The Wumpa Counter on the HUD then resets to zero.

## Gems

Each level in *Crash Twinsanity* contains 6 multicolored gems. If you collect all 6 of these gems in each level, you may unlock bonus content in the Extras Menu. To check your progress, enter the Pause Menu and press the L1/L2/R1/R2 buttons to cycle through the Gem Collection Menu. Here you can track your progress for collecting gems in every level. Make sure to look for them all!

## Wumpa Crates

**BASIC CRATE** – When broken, gives the player 1 Wumpa.

**SURPRISE CRATE** – When broken, gives the player between 5 and 10 Wumpa.

**REINFORCED WOODEN CRATE** – Can only be broken by a slam move; when broken, gives the player between 5 and 10 Wumpa.

**MULTIPLE-HIT CRATE** – If broken, it does nothing. If jumped on or head butted, it will give you two Wumpa for each hit.

## Harmful Crates

**TNT CRATE** – Explodes immediately if broken, or counts down from 3 before exploding if jumped on.

**NITRO CRATE** – Explodes when touched.

## Platform Crates

**IRON CRATE** – Completely inert, can be used as a platform.

**IRON-SPRING CRATE** – When landed on, propels the player into the air. Cannot be broken.

**WOODEN-SPRING CRATE** – When landed on, propels the player into the air. Can be broken by spinning, slamming, or any damage.

## Special Crates

**AKU AKU CRATE** — Gives player 1 extra hit-point.

**OUTLINE CRATE** — This crate is only visible as outlines until you activate a nearby iron-switch crate. Once triggered, the outline crates will become solid, allowing you to stand or walk on them.

**IRON-SWITCH CRATE** — When landed on or spun, activates any outline crates linked to it.

**CHECKPOINT CRATE** — Triggered by proximity, these crates record Crash's position. If you lose a life, you will restart at the last Checkpoint that you've activated.

**DETONATOR CRATE** — When landed on or spun, will detonate nearby nitro crates linked to it.

**WORLD CRATE** — Triggered by proximity, these crates represent saving points. If you have auto-save on, the game will automatically save your progress when you trigger a World Crates. You can also manually save your progress through the Pause menu after hitting these crates. If you run out of lives or load a saved game, you can continue at the previously triggered World Crates.
