If you begin boarding toward the top of the pipe, the Wrong Way alert appears and your score will rapidly begin to drain. Turn your board in the direction of the finish at the bottom of the pipe.

Basic Rider Controls

Speed Up

To get up to speed from a stop, tap the left analog stick UP repeatedly.

Turning

- Press the left analog stick LEFT/RIGHT to turn.
- To carve and reduce sliding in a turn, press and hold the  button.

Jumping

Press and hold the  button to ollie just before you hit a kicker and release the button to ollie into the jump. Don't hold down the  button unless you intend to jump.

Braking

Press the left analog stick DOWN to slow or stop.

Riding Rails

Press and hold the  button to lock onto rails. Release and land by pressing either  or  buttons.

PERFORMING TRICKS

Rotations

To increase rotations:

Push the left analog stick LEFT or RIGHT while airborne to increase rotations in the trick. Press the **L1** button and **L2** button during the rotation to speed up your rotations.

Chain Tricks and Combos

Bonus points can be earned by giving a fluid run, with rapid transition from one trick to the next. When the Chain Tricks Clock and Chain Score Multiplier appear at the top of the screen, you can earn bonus points. To trigger the Chain Tricks Clock and Chain Score Multiplier, link at least two tricks (a combo) together. A multiplier number beginning with "1.1" appears above the clock. If you land your next trick within the time displayed on the Chain Tricks Clock, your score will be multiplied by that number. Each successive trick adds seconds to the clock allowing you still more time to keep the chain going. The multiplier also increases with each additional trick. At 1.5 and above, your rider can perform his or her Special Move. Note: You must hit the ground before the clock runs out to keep Chain Tricks going.

Special Tricks

These are signature moves by the pro snowboarders featured in ESPN™ Winter X Games Snowboarding 2002 and become available when the Chain Score Multiplier reaches 1.5 or above. Ollie (press **X**) while executing the commands. Some riders have two tricks, which can be pulled off in different locations (i.e in the halfpipe or off a "kicker" (jump)).
