Be a responsible rider. Riding a motorcycle is an exercise in responsibility - to yourself, to others, to the environment, and to the sport. So remember, wear a helmet, eye protection, and protective clothing whenever you ride. Never ride under the influence of drugs or alcohol, and never use the street as a racetrack. Inspect your motorcycle before riding and read your owner's manual. Always obey local laws, use common sense, and respect the rights of others when you ride. Make sure you have a proper license when riding on public roads, and never modify your motorcycle's exhaust system.

Kawasaki
MANUAL DESIGN BY V DESIGN, INC.

IMPORTANT WARNING: NEVER TRY TO INSERT OR REMOVE A GAME PAK WHEN THE POWER IS ON!

Instead, first turn the power OFF on your N64®.

Then insert the Game Pak into the slot of your N64®.

Press firmly to lock the Game Pak in place.

Turn the power switch ON. After the game title and legal screen appear, you may bypass the game intro screens at any time by pressing the START Button.

Designed For N64 Expansion Pak™

If you have an Expansion Memory Pak™ in your N64, you can select the Video Display menu in Option Mode to adjust the dimensions of the viewing screen. The 640 x 240 perspective is generally the best for new riders because it provides the largest view of the road ahead.
NOTE: The Expansion Pak™ is required for use of the Track Editor option.

The Nintendo 64 Control Stick uses an analog system to read the angles and directions of its movement. This allows precision control that you will not find using the conventional Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, release the Control Stick so it returns to its center position (as shown in the picture on the left) then press the START while holding down the L Button and R Buttons at the same time.

The Control Stick is a precision instrument. Avoid spilling liquids or placing foreign objects on or in it.

This game is compatible with the Controller Pak™ and Rumble Pak™ accessories. Before using these accessories, please read the Controller Pak™ and Rumble Pak™ instruction booklets carefully. Follow the on-screen instructions to determine when you should insert or remove the Controller Pak™ and Rumble Pak™.

Controller Functions

L BUTTON

Switches the game view from the default, over-the-shoulder view to a first person, directly-over-the-handlebars perspective.

CONTROL PAD

The Control Pad is not used in Top Gear Hyper-Bike. It's much easier to steer your bike using the Control Stick instead.

START

When racing, you can pause the game by pressing the START. This brings up the Continue menu and other game options.

CONTROL STICK

Push the Control Stick left or right to steer. You can execute airborne stunts if you move the Control Stick while holding the B Button. Pull the Control Stick back to slide around corners.

Connector Slot

Top Gear Hyper-Bike is Rumble Pak™ and Controller Pak™ compatible. To save your game, plug a Controller Pak™ into this connector slot.

R BUTTON

Press and hold R Button to look behind your rider.

C BUTTONS

Press the C-Down Button to expend a short Nitro boost. Press and hold the C-Down Button for an extended boost.

A BUTTON

Pressing and holding the A Button opens the throttle and makes your bike accelerate. Gear shifting is conveniently automatic.

B BUTTON

When racing tap the B Button to apply the brakes. In Trick Attack, use the B Button to execute tricks.

Z BUTTON

Hold the Z Button to increase your Spring Gauge. Press B and release it to jump.

REV IT UP

Top Gear Hyper-Bike features five incredible modes of play for one or two players. We'll break down all of the modes in detail over the next couple of pages, but if you can't wait to ride white lines or pound the whoops, check out this handy game summary:

SINGLE RACE

One to four players can race against each other in this mode. Since there are no stunt points or checkpoints to worry about, you can also spend time exploring the courses and looking for shortcuts.

TIME ATTACK

Time Attack is a one-player race against the clock. Ride as fast as you can through each checkpoint on the course. If you miss a checkpoint, you'll have to turn around and find it before time runs out. When you replay you'll be able to see a "ghost" of your best run.

TRICK ATTACK

When you start Trick Attack Mode, you can choose to run through a tutorial or dive right in to the real thing. Trick Attack is a high point contest for one or two players. Like Time Attack mode, you ride through the checkpoints and score bonus points by executing amazing stunts. When you replay you'll see a "ghost" of your best run.

CHAMPIONSHIP

A multi-race game, Championship mode is for one or two players. Win a complete season and you'll unlock hidden bikes in the game!

TRACK EDITOR

Track Editor allows you to create and save up to three tracks. When you think you've got what you want, you can test it. After you've saved it, the track will be available in Single Race, Time Attack and Trick Attack Modes.

OPTIONS

Adjust the game sound, brightness or video modes at the Options menu. If you're looking for a particular saved game from an earlier race, use this menu to browse the contents of your Controller Pak memory.

MODE SELECT
SINGLE RACE

Pick a bike, select a track and let it rip—the only rule in Single Race mode is the law of gravity, and you can break that by blasting off incredible jumps. Use this mode to race against another player, or take your time and look for hidden shortcuts.

CUSTOMIZE YOUR TEAM COLORS

While it won't improve your top speed, creating new team colors will certainly distinguish you from the rest of the pack. Press Left or Right on the Cotrol Stick to select different leathers. Press the Z Button when you select your bike or rider to change color schemes.

TIME ATTACK

Time Attack mode is a race against the clock—the object is to reach the next checkpoint before the timer counts down to zero. When you race the same course a second time, you'll spot a ghost image of your best time around the track. Keep riding faster and dust your best times!

TRICK ATTACK

In Trick Attack you race between check-points, but you also earn trick points. If you want to you can choose to go through a tutorial at the beginning if Trick Attack Mode. In the tutorial, at the top left of the screen, the button configuration for a trick will appear. You must complete each trick three times to move on to the next trick. To do a trick, hold the Z Button to increase your spring, then release it while in mid-air off a jump. Press the B Button and move the Control Stick to complete a trick.
CHAMPIONSHIP

Championship mode is a one or two player racing campaign challenge in which racers ride against one another through multiple-race seasons. If you win an entire season, you'll unlock new bikes and courses that you can race on in the other game modes!

OPTIONS

Use the Options menu to adjust game sound volume, screen brightness and the video display, or check out your saved game files on any Controller Pak. This versatile menu lets you change the levels of the game music or sound effects or eliminate shadows on darker courses. If you have an Expansion Pak™ in your N64, you'll be able to switch to a hi-resolution mode and add a letterbox frame around the screen.

SCREEN VIEWS
CHAMPIONSHIP MODE

6 SPEEDOMETER

This shows how fast you're going. Unless you like sudden detours, check your speed before entering a series of tight turns.

7 TACHOMETER

This tells you your engine RPM. Unless you're already in top gear, you'll automatically shift when the tachometer turns red.

8 YOUR BIKE

That's you, pal. If you hate watching yourself, tap the L Button and take in the view from a first-person perspective.

9 SPRING GAUGE

The Spring Gauge shows how much spring energy you have ready for your next jump. Hold the Z Button down to power up the gauge.

10 GEAR

This shows the gear you're currently in. Generally, low gear is great for hills and high gear is ideal for ripping up flats.

TIME AND TRICK ATTACK SCREEN VIEW

11 CHECKPOINT TIMER

The main objective in Time Attack and Trick Attack modes is to reach the next checkpoint before the Checkpoint Timer counts down to zero. The number on the timer is how many seconds you have to reach the next checkpoint and extend your playing time.

1 TIME

This shows your current lap time. As you complete more laps, your previous lap times will appear above the current time.

2 YOUR POSITION

This shows your standing in the race field. It's pretty much a no brainer that you want to see the number 1 here all the time.

3 LAP

The lap counter shows how many laps remain in your race. A banner above the finish line will also announce the final lap.

4 NITRO COUNT

This shows how many Nitro Boosts remain in your inventory.

5 CHECKPOINTS

You don't have to worry about a checkpoint countdown meter in Championship mode, but you still have to ride beneath each Checkpoint banner during a race. If you miss a checkpoint, you won't finish your current lap until you return to the checkpoint banner you missed.

With the exception of the Checkpoint Timer, the statistical information on the screen in Time and Trick Attack modes is almost identical to the Championship mode display. Some players get totally stoked on stunts and forget the timer—something you need to monitor in Trick Attack.

DIRT BIKES

KAWASAKI KX80

Powered by a liquid-cooled, 82 cc two-stroke engine, the Kawasaki KX80 is outstanding for beginners.

HONDA® XLR125R

The Honda® XLR125R is a solid and dependable four-stroke motocross bike.

KAWASAKI KX125

The KX125 might look similar to the Honda® XLR125R, but it's lighter and features a high revving engine, making it an ideal big air bike.

YAMAHA YZ250

The YZ250 features a liquid-cooled, two-stroke engine and an excellent chassis design. It's one of the most balanced bikes in the game.

YAMAHA YZ426F

The YZ426F comes with a short-stroke, liquid-cooled, five-valve engine, giving this bike high speed and acceleration.

YAMAHA XTZ650

The XTZ650 is actually a dirt/street hybrid. While it has an incredible top speed, it takes an expert rider to guide it through tight turns.

HONDA® CR®500R

Launch this seemingly overpowered rocket off the steeps and you'll probably end up on the moon. This bike is for expert riders.

MONKEY

Keep finishing first in each Championship mode season and you'll release this 800 lb. gorilla. Once it's out, nobody will catch it.

STREET BIKES

HONDA® NSR125

This entry- bike has plenty of power to blast through the straights, but you'll need to throttle back to corner on the turns.

YAMAHA TZR250 SPR

The Yamaha TZR250 SPR has more power and acceleration than the NSR125 and it does a better job soaring through turns on the advanced courses.

KAWASAKI ZX7R

The modified four-stoke Kawasaki ZX7R Ninja features breath-taking acceleration and tremendous speed—but it's strictly for advanced racers.

HONDA® CBR®900RR FIREBLADE

The CBR®900RR features big bore power in a small bore chassis, resulting in wild, eye-tearing acceleration.

CUDATI 750

This Italian thorough-bred packs an advanced four-stroke V-Twin engine for explosive power.

YAMAHA YZR500

Even if you're one of the best riders on the circuit, you'll have a tough time taming this monster. It easily tops 200 mph—without Nitro.

JULIO

Remember how people giggled when they found out about the milk truck in Top Gear Rally? Don't laugh or you'll end up eating dirt too.
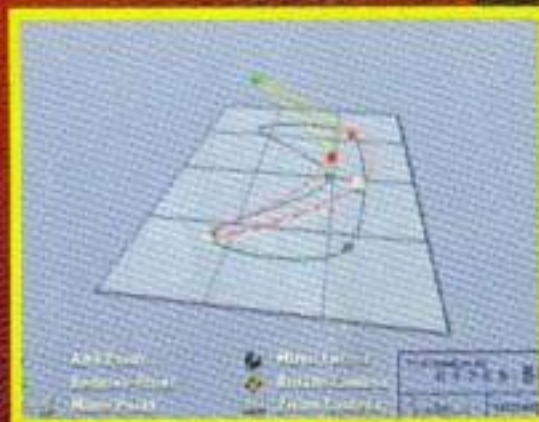

BISON

Like the legendary bison that once roamed the plains of North America, this bike is a wild beast that rules today's streets.

TRACK EDITOR

Track Editor allows you to create and save up to three tracks. When you think you've got what you want, you can test them. After you've saved them, the tracks will be available in Single Race, Time Attack and Trick Attack Modes.

If the Track Editor tells you to fix your trouble spots before you can race on your track, one or all of the following could be the problem:
1. Line segment is too steep (indicated by a blue highlighted segment)
2. Line segment overlapping or bends too sharply (indicated by a yellow flashing line segment)
3. Track too short (indicated by text on the screen)

NOTE: The Expansion Pak™ is required for use of the Track Editor option.

BONUS STUFF

You'll find Nitro Bursts and Nitro Boosts in groups along the roads and lesser-known byways.

NITRO BURST

Unlike Nitro Boosts, which you can save and use whenever you want, Nitro Bursts are one-time freebies. Your bike will surge forward the moment you hit a Nitro Burst.

NITRO BOOSTS

Nitro Boosts are inventory items that temporarily increase engine horsepower, giving you extra speed to soar over steep hills or pass racers on the course.

LIMITED WARRANTY

KEMCO warrants to the original purchaser of this KEMCO product that this game is free from defects in materials and workmanship for a period of ninety (90) days from the date of purchase. This KEMCO product is sold "as is" without expressed or implied warranty of any kind, and KEMCO is not liable for any losses or damages of any kind resulting from the use of this product. If a defect covered by this warranty occurs during this 90-day warranty period, KEMCO will repair or replace the game Pak, at its option, free of charge. Send product postage paid, along with the dated proof of purchase to the address shown below.

TO RECEIVE THIS REMEDY
1. DO NOT return your defective KEMCO software product to the retailer.
2. Send the defective product via registered mail, along with receipt as proof of purchase to the Vatical Warranty Return Center at:

KEMCO TOP GEAR® HYPER-BIKE
1840 East 27th Street
Vernon, CA 90058

The TOP GEAR® HYPER-BIKE Customer Support telephone number is: 323-234-9911

When you write to us, please provide us with your telephone number and a brief explanation of what appears to be wrong with the product. The remedy provided above is your exclusive remedy if the Vatical software product does not comply with this Limited Warranty.

This warranty shall not be applicable and shall be void if the defect in the Vatical product arises through abuse, unreasonable use, mistreatment or neglect. THIS WARRANTY IS IN LIEU OF ALL OTHERS WARRANTIES AND NO OTHER REPRESENTATIONS OR CLAIMS OF ANY NATURE SHALL BE BINDING ON OR OBLIGATE KEMCO. ANY IMPLIED WARRANTIES APPLICABLE TO THIS PRODUCT, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE NINETY (90) DAY PERIOD DESCRIBED ABOVE. IN NO EVENT WILL VATICAL BE LIABLE FOR ANY SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM POSSESSION, USE OR MALFUNCTION OF THIS PRODUCT.

Some states do not allow limitations as to how long an implied warranty lasts and/or exclusions of limitations of incidental or consequential damages, so the above limitations and/or exclusions of liability may not apply to you. This warranty gives you specific rights, and you may have other rights, which vary from state to state.
