WAR ON ALL FRONTS

Never before has the Green Army faced such a threat. The Tan are massed on all borders, ready to strike at the heart of the Green homeland.

Every last plastic soldier of the Green nation is called up to serve his country in this bleak hour. You are one of them.

The challenges are immense, but your country has great faith in you. Fellow soldiers will aid you in some of your battles, but it really comes down to your own ability, determination and endurance. The Tan are present in three theaters of war, entrenched and waiting.

It is up to you to purge the lands of their threatening presence and restore balance to Green and Tan territories. The Pacific, Eastern and Western fronts are your battlefields. Succeed and the Green nation prevails - its existence ensured by you, a hero who has risen to overcome the most difficult of situations. Fail and the Green nation is doomed!

ENEMY AND ALLIED SOLDIER TYPES

Depending on the mission, fellow soldiers will join you in an attempt to help complete the mission objective. Your enemies, however, are an entirely different matter. They have instructions to take out any of your army's troops that they come across, including you.

Rifleman

The Rifleman is the standard soldier of any army. They are exceptionally effective in small groups or when several converge on one target from multiple locations. Beware when the enemy Riflemen come at you in numbers. Even a few enemy Riflemen can turn an unaware soldier into a pile of plastic pieces.

Grenadier

These soldiers are very skilled at taking out entrenched positions. Take care, should they attack your location. If they themselves are entrenched, get rid of them as soon as you can. Lone enemy Grenadiers can do a lot of damage to you and your allies with just a few grenades.

Machine Gunners

These nested soldiers are hard to reach and keep you at length with their deadly stream of fire. Long-range weapons are useful at taking these guys out.

Flamethrower Man

Another type of soldier who is great at taking out fortified enemy locations is the Flamethrower Man. The strength of this soldier is the amount of damage a continuous stream of flame can do. Their limitations are that they only fire straight ahead when running and have a relatively small supply of fuel. Remember these weaknesses, and use them to your advantage.

Bazooka Man

Though ideal for taking out light armor, the Bazooka Man can still inflict enough damage to threaten heavy armor. They inflict a lot of damage, period. Keep in mind the slower reload time.

Mortar Man

Not even a tank can last very long from the shells of a Mortar Man. While the Mortar Man packs a great punch, the reload time is slow.

CAMPAIGNS

Pacific Campaign

Start in your efforts against the Tan on a strategically important island held by their army. It is here where your road to ultimate success or failure begins. You must make your way to the airport and capture it. Green forces need this critical location as a center for further operations. The path to the airport is a series of smaller mission objectives that will ultimately help you reach your goal. The Tan realize that losing the island would be a major blow to their war efforts, so expect them to come at you with all the resources they can muster.

Eastern Campaign

You arrive in the theater of battle just as the Blue are making their last stand in their capital city. If the Green should lose the help of the Blue, there is no chance of turning the Tan away from eventual conquest of your Green homeland. It is up to you to help defend your Blue allies, stem the tide of battle, and pursue the Tan with the rest of the Blue Army across their homeland. In the first mission, you move through several sections of the Blue city where the Tan have invaded. You must turn back the Tan in all of the sections. You'll be helping the Blue plenty in this theater. Don't ever forget that though you are far from home, your efforts are bringing the war ever closer to the evil Tan territory.

Western Front

You start the last theater of war landing with the Green forces on the beaches of the Tan homeland. Your mission is to work with the Green forces and push to the Tan capital. Use the cover on the beach to work towards the base of the hills inland. Then clear the hills of the large guns that are keeping the main Green invasion force from landing. You must discover yourself how to finish the rest of the theater campaign. Win in this campaign and you win the war for the Green.
