About this Manual

We've structured this manual to include more *why* and *what* information and less *how* information—why you might want to choose different options rather than how to press the buttons. If you're not sure which buttons to press in a menu screen, press and hold ▲ to get Help.

MADDEN BOWL™—Built on the credo of 'Fame and Game', Madden Bowl is a celebrity Madden tournament held annually at the Super Bowl®. The pinnacle of competitive sports gaming, this winner-take-all slugfest features the best NFL and celebrity Madden players. Madden Bowl 97, the third annual tournament, crowned Jimmy Spencer of the Bengals as the champion. Madden Bowl 98 will be held in San Diego during Super Bowl XXXII.

[PLAYING THE GAME]

Madden NFL 98 utilizes a TV-style presentation and competition-tested gameplay to deliver a true interactive football experience. From referee Red Cashion's calls to instant stats, drive summaries, and instant replays, if it's in the game, it's in the game™.

PLAYCALLING SCREEN

The Playcalling screen is the key to success in *Madden NFL 98*—if you don't call the right plays, it doesn't matter how well you execute them.

Defense is always at the top of the screen, offense at the bottom

To call a play:

1. Highlight a formation and press the corresponding button (■, ✕, or ●).
- ◆ If you choose a formation and then change your mind, press ▲ to back up and make a new selection.

EA TIP

If your opponent is watching your play selections too closely, you can fake him out.

EA TIP

If you're playing with Fatigue ON, a bar below the QB and each receiver shows his fatigue level.

EA TIP

The L1/2 and R1/2 buttons can also be used in conjunction with ■ to call preset audibles from your current formation. L1 and L2 call various running plays, and R1 and R2 call passing plays. Experiment with the presets to find combinations that work with your style of play.

RUNNING PLAYS

You can watch the computer execute the play or you can take control of the ball carrier after the hand-off. A color-coded star and player identifier appear beneath the ball carrier.

To execute a running play:

1. When the offensive line is set, press **✕** to snap the ball. The hand-off or toss is automatic.
2. D-Button any direction to take control of the ball carrier.

To break tackles and shake defenders:

- ◆ To **lateral** to your nearest teammate, press **R2**.

EA TIP

*If your quarterback is in danger of being tackled, press **■** to make him slide feet first. This keeps the quarterback from getting injured by a rough tackle.*

PASSING

Hike the ball and let the computer execute the play, or move the D-Button to take control of the QB on passing plays.

To execute a passing play:

1. To snap the ball when the offensive line is set, press **✕**.
2. To move the QB and take control of the play, D-Button any direction.

3. To call up the passing symbols, press **✕**. A yellow symbol appears above each eligible receiver on the field. These symbols correspond to the **■**, **✕**, **●**, **L1**, and **R1** buttons on the Controller.

Watch the receivers run their patterns on the field and throw a pass to the open man.

Once the ball is in the air, a yellow crosshair appears on the field to mark the ideal reception spot.

- ◆ To **throw away** the ball if all the receivers are tightly covered, press **▲**.
- 4. To **throw a pass** to the corresponding receiver, press **■**, **✕**, **●**, **L1**, or **R1**.

The receiver automatically completes his pattern toward the crosshair, attempts to make the catch, and runs upfield. While the ball is still in the air, you can manually control the designated receiver to make the catch.

To control the intended receiver:

1. To take **control** of the receiver while the ball is in the air, press **✕**. A color-coded star appears on the field beneath the player.
 2. D-Button any direction to guide the receiver toward the yellow crosshair.
- ◆ To **dive** for the ball, press **■**.
 - ◆ To **jump** and raise your hands for the ball, press **▲**.

With Touch Passing, the longer you hold the button, the harder the pass. Tap the button for a soft, high-arcing pass; hold for a low bullet pass. Between these two extremes is the perfect touch pass.

DEFENSE

While some controls remain the same on offense and defense, there are major differences as well—in both attitude and the special controls defined in this section.

BEFORE THE SNAP

After you call a play you can switch players, call audibles, and adjust your coverage options before the snap.

- ◆ To call an **audible**, press ■, then ■, ✕, or ●. (▲ to cancel.)
- ◆ To cycle **control** through the defensive players, press ✕.

NOTE: You can reposition the defensive player you control, but if you make contact with an offensive player before the ball is snapped or are past the line of scrimmage when the ball is snapped, an encroachment or offsides penalty is called.

- ◆ To call aggressive **bump-and-run** pass coverage (or return to normal coverage), press **R1**.

AFTER THE SNAP

- ◆ To **control** the player closest to the ball, press ✕.
- ◆ To make a **power** move to get free or make a power tackle, press ●.
- ◆ To **dive** to make a tackle, press ■.
- ◆ To **jump** to catch or block the ball, press ▲.
- ◆ To use a **swim move** to get by a blocker, press **R2**.

PAUSE MENU

Press **START** to pause the game when you need a break or want to change options, view stats and replays, or exit the game.

SUBSTITUTIONS

Most players leave this setting on **AUTO** and let the computer make changes, but if you want to tinker with your lineups, this menu provides a powerful set of tools.

➤ **SUBSTITUTIONS:** Leave on **AUTO** or set to **MANUAL** to make changes as described below.

The bar next to each player's name shows his current fatigue level.

GAME FLOW

Halftime: The Halftime Stats screen shows the current stats while Madden comments on the action so far. Press **START** to continue.

► **OFFENSE/DEFENSE:** Select the individual players assigned to each set and/or formation.

- ◆ To select a player, D-Button ↔. (To cycle ratings, D-Button ↑.)
 - ◆ To sub for the selected player, press ✕, highlight a second player then press ✕ again.

► **RESET ALL SUBS:** Return all formations to the default starting lineup.

GAME SETTINGS MENU

Most options are identical to those described in the Game Options menu (➤ p. 8). The unique options are described below.

▶ **PLAYER DISPLAYS:** Cycle the text that appears below controlled players to **BY NAME**, BY NUM(ber), BY POS(ition), or NONE.

▶ **EAS INSTANT REPLAY:** Toggle EA SPORTS automatic replays of big plays **ON/OFF**.

▶ **ANY PLAYER CONTROL:** (*Single Player only.*) Toggle ON if you want to be able to control any offensive player before the snap—be a smarter blocker, back, or receiver if you think it will help your team.

- ◆ To cycle through players in ANY PLAYER mode, press ▲.

▶ **CAMERA VIEW:** Go to the Camera Settings menu to select from the available game-play views.

▶ **SET OFFENSIVE/DEFENSIVE AUDIBLES:** Go to the Set Audibles screen to select the three plays you can audible at the line of scrimmage.

- ◆ To change a play, select the play you want to change, then use the Playcalling screen at the bottom of the screen to select a new play.

EA TIP

You snap the ball the same way when you're controlling a player other than the QB—with ✕. If you're controlling a receiver during the play, you can call for the ball by pressing ✕. If the QB hasn't started throwing to someone else, he'll throw to you.

[SEASON, TOURNAMENT, AND FANTASY DRAFT MODES]

Madden NFL 98 contains three series modes: regular or custom Seasons, competitive multiplayer Tournaments, and a new Fantasy Draft mode where players draft complete teams then play a season against each other.

SEASON MODE

The SEASON option from the Main menu takes you to the start of a Season based on the 1997–98 NFL schedule. You can use either default or modified (i.e., rosters that reflect your trades, created players, etc.) rosters in a Season. After you select SEASON and whether or not to use modified rosters, the Season Week screen appears for Week 1 of the season.

➔ To Create a CUSTOM SEASON:

- ◆ Select CUSTOM SEASON from the Main menu.
- ◆ To cycle through NFL divisions, press **L1/R1**.
- ◆ To cycle teams for the highlighted division slot, D-Button **↔**.

In this manner, you can set up a custom NFL season league using the teams of your choice—including classic teams.

NOTE: A team can only appear in one slot during a Season. You must remove a current NFL team from its current slot (i.e., replace it with a classic team) before you can place it in another division.

SEASON WEEK SCREEN

- ▶ **PLAY WEEK:** From this screen you select the games you want to play.
 - ◆ To toggle the yellow selection symbol for games you want to play, highlight a matchup and press ■.
 - ◆ To play the first selected game, press ✕.
- ▶ **TEAM SCHEDULE:** View the Season schedule by team.
- ▶ **TEAM STANDINGS:** View standings by division, conference, or the entire league.
- ▶ **INJURY REPORT:** View a list of injured players (if any) by team.
- ▶ **SEASON STATISTICS:** View team and player stats:
 - ▶ **INDIVIDUAL STATS:** View player stats—broken down by NFL, conference, division, or team, and stat type (e.g., passing), and sorted by individual stat (e.g., passing yardage).
 - ▶ **TEAM STATS:** View comprehensive NFL team stats—down to obscure categories such as the number of two-point conversions made.
 - ▶ **TEAM RANKINGS:** View NFL and division rankings for each team.
- ▶ **PLAYER AWARDS:** View the Offensive and Defensive Players of the Week during the Season and the MVP at the end of the Season.
- ▶ **FRONT OFFICE:** Go to the Front Office screen (➤ p. 27).

NOTE: To preserve statistical integrity, you can't delete Created players in Season mode.

END OF THE SEASON

After the last game, the playoffs begin, starting with the Wildcard games, then the Division Playoffs, Conference Championships, and Super Bowl®. Before each game, the Playoff Tree screen shows the current playoff results and matchups. Once the playoffs conclude, you can play additional season(s) using your current rosters.

TOURNAMENT MODE

The TOURNAMENT option from the Main menu takes you to the start of a new 8- or 16-team single elimination Tournament.

- ◆ After you select the number of players, enter a name for each player at the Tournament Names screen.
- ◆ At the Tournament Teams screen, each player chooses which NFL team s/he controls. (The computer randomly chooses the order in which players choose.) The Tournament Menu screen appears:

- ▷ **TOURNAMENT TREE:** Choose which games to play. D-Button ↔ to highlight a matchup, then press ✕ to play that game.
- ▷ **TEAM STATS:** View stats for each NFL team in the Tournament.
- ▷ **INDIVIDUAL STATS:** View stat leaders for each NFL player in the TOURNAMENT.

FANTASY DRAFT MODE

The *Madden NFL* FANTASY DRAFT combines the strategy of a fantasy football league with the action of Madden football. First, select a 4- or 8-team league, then select HUMAN or CPU control for each team's draft:

- ◆ Select a control type for the highlighted team, then press **✕** if you want to change the player name for the team. Press **START** to continue.
- ◆ Next, select a team name for each team from those available (**✕** to confirm and advance to the next team.) The Fantasy Draft screen appears.
- ❑ Teams select in random order in the first round, then in the same order thereafter.
- ◆ To let the computer finish the draft for you, press **START**.

After all teams have selected complete rosters, the Play Week screen appears. A round robin tournament begins in the following format:

- ❑ **4 Teams:** Each team plays every other team, then all teams proceed to semi-final matchups based on their records. The winners of the semi-final games meet for the championship.

- ❑ **8 Teams:** Teams are split into two 4-team divisions and play in the same manner as in a 4-team tournament. The winners of each division meet for the championship.

NOTE: Any human player can control any fantasy team during game-play, no matter who controlled the team during the draft.

[FRONT OFFICE]

FRONT OFFICE MENU

Madden NFL gives you complete control of your rosters. You can create, trade, release, and sign players subject only to salary cap restrictions.

NOTE: Front Office options are only available in EXHIBITION and SEASON modes. Roster changes within a Season don't affect the default Exhibition rosters that are saved with game preferences. Season roster changes are saved with Season data.

➤ **TRADE PLAYERS:** Make a one-for-one trade between any two NFL teams.

- ◆ To cycle through NFL teams, press **L1/R1**.
- ◆ To make a trade, highlight a player and press **✕**. Select a second player from another team then press **✕** again (● to cancel).
- ❑ If the Salary Cap is ON, you can't make a trade that will take a team over the cap limit.

EA TIP

Releasing players can give you cap space for signing a valuable free agent or Created player—or enough room to complete a trade.

➤ **SIGN/RELEASE PLAYER:** Sign a free agent or release a player to the Free Agent List.

➤ **REORDER ROSTER:** Shuffle your depth chart order to set your starting lineup and substitution order.

◆ To cycle through teams, press **L1/R1**.

◆ To cycle through player positions, press **L2/R2**.

◆ **To swap a player's spot on the depth chart with another player,** highlight the player you want to change and press ✕ (● to cancel). Highlight another player and press ✕, and the players swap positions.

➤ **CREATE PLAYER:** Create a new player to your specifications:

TEAM: Assign the player to the Free Agent List or a specific team.

NAME: Enter the player's full name.

POSITION: Set the player's natural position.

NUMBER: Select the player's jersey number from those available for his position.

HEIGHT/WEIGHT: Select the player's size.

HANDED: Select the player's strong hand.

SKIN: Select player's skin tone.

EA TIP

You can sub a player away from his natural position, but we don't recommend moving him very far.

Moving a tackle to defensive end may be OK, but don't try him at safety...

- ◆ To continue to a second screen of ratings, select **CONTINUE**.
- ❑ Player ratings default to **40** on a scale of 1–99. As you increase each rating level, the overall pool decreases. When the pool reaches 0, you cannot increase any rating levels.

NOTE: Each position has a different set of ratings. The rating maximums are derived from the highest rated player in each position, so certain ratings cannot be set at 100. Also note that the number of points in the pool varies randomly.

- ◆ When you've set the ratings at the levels you want, press **✕** to confirm. A popup screen shows you the player's salary and gives you a chance to save and exit or cancel.

▶ **DRAFT PLAYER:** This option lets you draft *NCAA Football 98* players you've Created and saved to a file on a memory card. Select the appropriate memory card file from the list that appears, then select the Created player you wish to draft. The player becomes available from the Free Agent List.

▶ **DELETE PLAYER:** Delete a Created player from the list of saved players.

EA TIP

You don't have to use up all the points in the pool. Assign high ratings only where they're most valuable—this makes the game more realistic and also gives you lower salaries to absorb in your cap.
