## **WARNING: READ BEFORE USING YOUR PlayStation™ GAME CONSOLE.**

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games, including games played on the PlayStation game console, may induce an epileptic seizure in these individuals. Certain conditions may induce previously undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game – dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions – IMMEDIATELY discontinue use and consult your physician before resuming play.

## **WARNING TO OWNERS OF PROJECTION TELEVISIONS:**

Do not connect your PlayStation game console to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

## **HANDLING YOUR PlayStation™ DISC:**

- This compact disc is intended for use only with the PlayStation™ game console.
- Do not bend it, crush it or submerge it in liquids
- Do not leave it in direct sunlight or near a radiator or other source of heat.
- Be sure to take an occasional rest break during extended play.
- Keep this compact disc clean. Always hold the disc by the edges and keep it in its protective case when not in use. Clean the disc with a lint-free, soft, dry cloth, wiping in straight lines from center to outer edge. Never use solvents or abrasive cleaners.

## **PRECAUTIONS WHEN USING THE ARCADE VERTICAL MODE**

Normally, the arcade games can be played by using a normal monitor in the horizontal position, as well as a special type of vertical monitor designed for the arcade vertical mode. A horizontal monitor can be set on its side to achieve the arcade vertical position, but we don't recommend that you do this. The player should not play Galaxian, Ms. Pac-Man, Dig Dug, Phozon or The Tower of Druaga when a horizontal type monitor is set on its side in the vertical position. This could cause the monitor to fall and cause an injury, or it could also cause the monitor to malfunction.

These games should always be played when the monitor is in the normal upright position.
