## Game type

Choose Arcade or Simulation mode, and a Difficulty Level from Easy, Normal or Hard! Once all selections are correct, highlight the Let's Go! box and press the X button to confirm. In Championship mode the game will now commence. For Practice and Time Trial modes there is an additional menu:

## Practice or Time Trial

### Track

Select an available track on which to compete.

### # of Laps

Alter the number of [PRACTICE only] laps from 1 to 15.

## Two-Player Mode

*Note* - Apart from Choose Character and Transmission type, all two-player menu selections are selected and confirmed by the Controller in Controller Port 1.

## Choose Player 1 and Choose Character 2

Each player can now choose a character and their preferred transmission. Once both players are happy with their selection, they can progress to the next screen by pressing the X button.

### Game Type

On the GAME TYPE menu, choose either ARCADE or SIMULATION DRIVING MODE. On this screen it is also possible to select SINGLE RACE or CHAMPIONSHIP modes and switch the CATCH UP on or off. Catch up means the trailing driver will be given a slight speed boost to enable them to catch the leader. From this menu, it's also possible to delay the start of either the 1st or 2nd player by a variable number of seconds, so the less experienced driver will have as much of a

chance to win as the seasoned pro. To alter either of the player delay times, highlight the relevant box and use the LEFT and RIGHT Directional buttons until the desired delay time is found. In Championship mode the game will now commence. For Single Race Mode there is an additional menu :

### Single Race

- **Track** Select a track on which to compete.

## Start Your Engines!

From the MAIN MENU the following options are available:

- 1 Player
- 2 Players
- Options

## One Player

*Championship* Begin a championship.

*Retry N* The number of tries the player has to continue a Championship. This varies according to difficulty level and to how far the player has progressed in the game. Once all retries have been used, this option disappears and the player must start a new Championship.

*Practice*

Practice a track, with opposition.

*Time Trial*

As above, but without opposition.

## Choose Character

There are six different characters you can choose to play. Each character has an individual driving style, personality and Boxster color and will be hated, loved or ignored by each of the other drivers. Pick your favorite and then choose a TRANSMISSION type.

**Let's Go!**

Confirm GAME TYPE selections by highlighting and pressing the X button when ready.

**Driving Mode**

Arcade or Simulation.

**Arcade mode**

Plays more like an arcade style racing game and is ideal for beginners.

**Simulation mode**

Faithfully portrays the Boxster driving experience and is best suited for gamers more familiar with the game.

**Difficulty Level**

Easy, Normal, Hard!

Increased difficulty means less time to start with and less time rewarded at check points, plus increased slow down when the curbs are hit.

In Championship mode, the game will now commence. For Practice and Time Trial modes there is an additional menu:

**Practice or Time Trial****Track**

Select an available track on which to complete.

**Number of Laps (Practice Only)**

Alter the number of laps to compete on from 1 to 15.

**Game On!**

## Choose Player 1 and Choose Character 2

Each player can choose a character from the six available. Each character has an individual driving style, personality and Boxster color, and will be hated, loved or ignored by each of the other drivers. Pick your favorite. Then select a TRANSMISSION type.

## Game Type

### Let's Go!

Confirm Game Type selections by highlighting and pressing the X button when ready.

### Driving Mode

Arcade or Simulation.

### Arcade mode

Plays like an arcade style racing game and is ideal for beginners.

### Simulation mode

Faithfully portrays the Boxster driving experience and is best suited for gamers more familiar with the game.

### Catch Up On/Off

With catch up switched on, the trailing driver will be given a speed boost. However, it will not be enough speed to glide past the leader. As the trailing driver catches up to the leader the catch up will ease off. This maintains excitement and keeps the leading driver on their toes. The only way for the trailing driver to take the lead is through skill and by pressuring the leading driver into making a mistake.

*1st Player Delay* In seconds, 1-15.

*2nd Player Delay* In seconds, 1-15.

Gives a variable time delay to the more experienced driver in order to maintain challenge and excitement for all levels of players.

In Championship mode the game will now commence. For Single Race Mode there is an additional menu:

### **Single Race**

*Track*

Select a track on which to compete.

## **Options Screen**

### **High Scores**

Records for all gameplay modes are stored here.

### **Controllers**

Customize the button configuration. Alter settings by highlighting the button next to the command and then pressing the desired button to reassign. There is also an option to calibrate the neGcon™ Controller / Mad Catz™ Steering Wheel from this screen if required.

### **Memory Card**

Save your progress and settings to a Memory card. Without a Memory card all settings and gameplay progress will be lost once your PlayStation™ game console is switched off. Make sure there are enough free blocks on your Memory card before commencing play. Note: You can save after every race by exiting to the Memory Card screen. To load a saved game, go to Retry.

## Sound

From this screen the music and sound FX settings can be altered via sliding controls and the sound output can be switched between stereo and mono. It's also possible to select a music track for each of the levels by choosing the CD PLAYER option from this menu.
